This is a community maintained wiki. Plagiarism reports, abuse reports and other contributions are welcome. For more information on editing please see: This page has been imported from the old site and is being imported into Wordpress.

Encyclopedic entry Programaotkrivanjeplagijatafreedownload [It seems that programaotkrivanjeplagijatafreedownload was born with the name of the last page on the old web site, so it has been renamed into the first page of the wiki, to avoid page duplication.] What is it? The page gives information on the project itself and how it was created. It includes a general description of its aims, project status, information about participating partners, and other background information. This is part of the series of Help pages created for project partners and the public. Content and structure Information is structured into the following sections: Introduction General description History Participating partners Participation policy Aims and objectives Licenses, copyright and licensing policy Open Source, Open Access, Open Science Open Access to Data Open Data Open Science, Collaboration and Open Access to research Participants License and copyright policy Open Access to research and data Open Access to education Participation in other projects and initiatives Participation in existing tools and platforms Project administration Long term vision Participants The list of participating partners may be downloaded as PDF. License and copyright policy This document outlines the project's Open Access, Open Data and

Open Science policies. It also contains a detailed paragraph about the participation of the project in other projects and initiatives. License and copyright policy Open Access Not quite... The project is not a so-called 'Open Access site'. The project is based on the principles of Open Access (Open Data, Open Science, Open Access to Education), which means that it is largely 'open' (open access to data, open data, and open education, respectively). The project is neither a 'free' nor an 'open' access publisher, and it doesn't have to- or do not intend to have any other business model, such as 'freemium' or 'private publications'. Open Data Not quite... The project doesn't have any other business model, such as 'freemium' or 'private publications'. Open Data Not quite... The project doesn't have any other business model, such as 'freemium' or 'private publications'.
