Issues of Social Class, Sex,. of the Brooke-Petershans,.Antibacterial treatment of an abscessed infected pilonidal sinus: a case report. A case of abscessed infected sinus is presented. The sinus was managed with multiple-stage debridement and carbapenem antibiotic therapy for the prevention of fatal complications. The key points in management included identifying the source of infection early, aggressive removal of purulent material and thorough debridement, and appropriate antibiotic therapy to avoid complications of sepsis. The role of further surgery in the management of pilonidal sinus is also discussed.--- author: - 'V. Bozza' - 'G. Canel' - 'M. Kramer' - 'K. Moriya' - 'A. Reichart' - 'T.
