“The result is a fluid, agile and more realistic football experience,” said Domenico Scala, Executive Vice President of EA SPORTS. “The game’s Football IQ has been improved, with a number of key new innovations, such as possession, transitions, open play and team tactics, to create a more flowing game of football. We have also introduced a host of new animations to help ensure the best-looking, most realistic football experience on PlayStation 4.” Football IQ gets a tweak The touch and control of football has been improved with two new touch features: Bequeathable ball to a teammate - Move on or off the ball, and have a pass reach its target - Move on or off the ball, and have a pass reach its target Possession arrow - Keep the ball on the ground for scoring, or pass it via touch line. In addition, 4 new dribbling moves (Cross, Z Trick, Crouch, Dribble Turn) have been added, while the Customise button has been simplified for easy management of player customisation options. Realistic Players The highly realistic movement and reaction of 22 players, new defensive actions and set plays, improved goalkeeping and ball physics, and more responsive environments have been added to “HyperMotion”. High Energy Players FIFA 22 adds more than 200 new player faces, with new animations that realistically capture heightened levels of energy and commitment. More cutting-edge animations have been added to give players a more natural, realistic reaction to tackling and collisions. Extra tight hip and knee turns and a sleeker, more muscular appearance have been added to players’ animations. These ensure players are more responsive and reactive to opponents, while the knee animation has been altered in a more realistic fashion. For example, when players run, the knee move is more fluid and natural. New Trajectories The 2D path of a ball is now more realistic, from the starting point of the pass to the final destination. Moving from one challenge to another has been improved with more realistic momentum. A new Shoot and Thrust trajectory combined with defenders’ jump enables players to better anticipate and react to the direction a shot is likely to go. An improved timing scheme prevents a player from long-distance shot opportunities against a stationary goalkeeper. Smarter Passes The pass
